- git
- Python

EDUCATION

Fullstack Web Development, 535 Hours - HackerU , May 2025

- Acquired comprehensive knowledge in front-end and back-enddevelopment.
- Gained hands-on experience with programming languages and developmentframeworks.
- Completed practical projects showcasing problem-solving and coding skills.
- Studied computer science and basic programming fundamentals during high school.
- Gained early exposure to logical thinking, algorithmic problem-solving, and programming concepts.

PROJECTS

- Built a dynamic and visually engaging personal portfolio website using HTML, CSS, and JavaScript to showcase web development skills and projects. Emphasized responsive design, clean code structure, and intuitive user navigation to ensure a professional and accessible user experience across all devices.
  Link to my portfolio - **Portfolio**

- Successfully developed a responsive and user-friendly personal budget management platform as part of academic training at HackerU. Led the design and implementation of core functionalities using React and Node.js, incorporating secure authentication, real-time data synchronization, and a seamless multi-device user experience.
